Summary

Not legal advice. Records your organisation's accessibility work; it does not certify conformance.

Month by month

- **September 2026:** 18 manual test results recorded

Scope and method

- Tool: automated accessibility checks, version 1.0.0.3, run inside the website.
- Standard: WCAG 2.2, levels A and AA. 69 automated checks on Posts, Pages: 18 of 18 items checked.
- Coverage: automated checks cover 44 of the 55 WCAG 2.2 A and AA success criteria; 40 have evidence from a check or a recent manual test; 11 can only be tested by a person.
- Automated checks find only part of the barriers WCAG covers. Manual test records, the statement and the other records below show the rest of the work.

Evidence ledger

The records above are kept in a tamper-evident ledger: changes to past entries can be detected. Each entry is sealed with a hash that includes the entry before it.

Latest entry when this pack was made: #1,979, September 28, 2026. Its hash:

6d3444cb3354dab5702785dade878cbbe4c5618adaa53a8542678fe4a8310651

Keep this pack. If the ledger were later rewritten, it would no longer contain this hash.
